

Data Archiving Registration/Activation

Catalog Number 76DA

Introduction

The Data Archiving feature must be activated on your PanelMate ePro PS unit before using. A serial number is provided below and is required for registration. The Data Archiving feature is configured using ePro Canvas Professional (Version 2.20 or above) and it can be tested on an inactivated ePro PS unit and on your PC for up to 60 minutes at a time.

Note: The serial number provided below is for licensing ONE ePro PS unit only. If multiple units require licensing, then additional 76DA licenses must be purchased. Keep this document in a secure place for future reference.

Installation

To obtain an activation key code you will need a registration code and the serial number provided below.

Note: The ePro PS unit on which the Data Archiving feature is to be activated must be loaded with ePro PS Runtime Version 2.20 or above.

License Registration

1. To obtain your registration code run the following command:

Start>Programs>ePro Software Suite>License ePro

2. Select **ePro DataArchive**. A registration code will be listed. Note the registration code for Step 4.
3. The serial number for Data Archiving (76DA) is shown below:

4. Send the registration code, serial number and other pertinent information to the Operator Interface Business Unit. You can FAX the registration information using the form found on the ePro Software Suite CD-ROM or you can register online by selecting Support at www.EatonElectrical.com. In return, you will receive an activation key code via email within 24 hours that is used to designate that the feature has been registered.

License Activation

1. Run the following command:

Start>Programs>ePro Software Suite>License ePro

2. Select **ePro DataArchive**. Enter the activation key code you received and click on the **Apply Activation Key** button. The status should change to *Registered-License Active*.
3. The Data Archiving feature has now been registered and activated.
