

PanelMate Bulb Replacement

Renewal Parts

April 2008
Supersedes June 2006

The following table includes information about PanelMate models and their backlights. In order to identify the PanelMate model and associated backlight information, you will need to follow the steps below.

1. Locate the Product ID label on the unit.
2. Locate the Model Number on the Product ID label.
3. Locate the Part Number on the Product ID label (note: all Part Numbers have the format 92-xxxx-yy where -yy is the revision).
4. Use the following table and match up the Model Number and the Part

Number to find information about the backlight and how to replace the backlight on your PanelMate unit.

Notes:

- When the listed Part Number includes a specific revision number it is critical that your number matches the complete Part Number to obtain the correct information from the table.
- There are some Part Numbers that are not listed because additional information is required to identify the correct backlight replacement kit. If you cannot find the Part Number of your PanelMate unit in the table below, call Eaton's Technical Resource Center (TRC) for additional assistance at 877-ETN CARE (386-2273).

Use the RA Information Requirements Form when returning product and clearly describe your repair requirements in the Symptoms/Comments section. If you are returning a unit for backlight replacement please note that only the backlight is to be replaced. If a unit is returned without specific instructions then the complete unit will be repaired and a higher repair price will be incurred.

The backlight MTBF values listed in the table below are for normal operation at standard environmental conditions. Many non-standard conditions, specifically operating the unit at temperatures below 50°F (10°C), will drastically shorten the bulb life.

Description	Model	Part Number	Backlight Field Replaceable	Backlight Kit		Return for Backlight Replacement Only (U.S. \$)	Backlight MTBF
